# Academic Review Day

FROM **MULBERRY SCHOOL FOR GIRLS**

---

## Story

Annually students at Mulberry School complete an Academic Review form within their planners. The form includes 3 targets accompanied by a plan for how to achieve them. Unfortunately, the targets remained buried within the planners and were rarely referred to again. Through **FrogLearn** we seized an opportunity to replace the paper planners and use the digital form facility to collect student targets instead.

## Impact

The digital forms are easy for the students to complete and tutors have immediate visibility over class targets. SLT can oversee the information at school level. Crucially the information is providing useful insight that hadn't been achieved before.
