

frog

For International Schools

The end-to-end solution for online teaching and learning

Easily transition between teaching and learning in
the classroom, Staff CPD and whole school
administration with **Frog**.

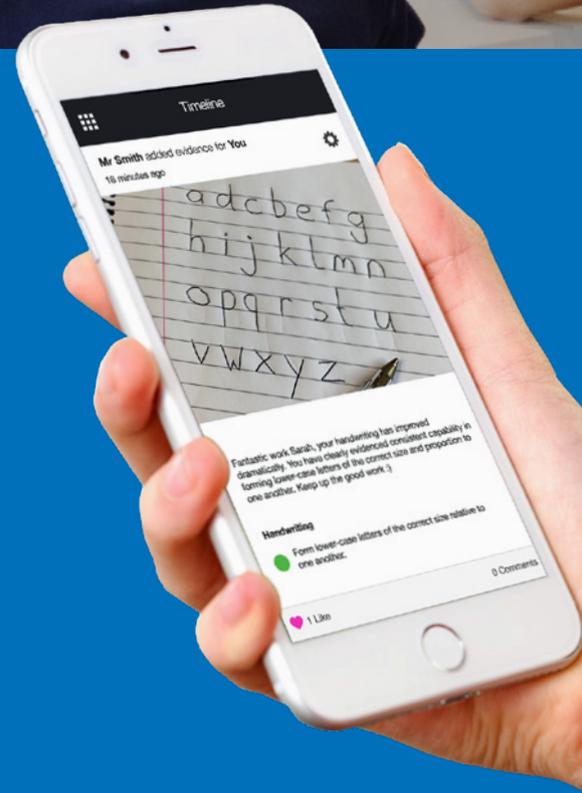

Instead of managing multiple platforms that require
unique logins and create confusion, bring everything
together in one secure environment.

From assignment setting to progress tracking, **Frog** will support teachers, pupils, and parents alike to keep a real-time record of a child's attainment, ePortfolio and grades.

Frog provides great scope to run interactive activities that will engage pupils in or outside of the classroom. Supporting tools such as self-marking quizzes, polls and forums give teachers the means to create a modern learning experience while saving time.

For a top-down approach schools can design and embed their chosen curriculum in **Frog**. This sets the scene for planning and tracking aligned with any key performance indicators set.

About Frog

Frog has been around for more than 20 years as a world class Learning Management System. **Frog** has refined its technology solutions over the years to the sophisticated suite it offers today. At the heart of **Frog** is the freedom to personalise and edit, something particularly loved by International Schools to achieve a point of difference.

The screenshot shows the Frog Parent Portal interface on a tablet. At the top, there is a navigation bar with a search bar and user profile information (LA). Below the navigation bar, there are several notification cards: "Remote Learning" (Please find instructions for view... seconds ago) and "Parental Notice" (Dear parents, You can find inform... 07/01/2021). The main content area is titled "Welcome to your Parent Portal" and features three main sections: "Letters Home", "Parent Notices", and "Video of the Month".

Sports Day Update

Thursday, 14th July 2020

Having looked at the weather forecast, we are still planning for Sports Day to go ahead on Friday. Keep your fingers crossed!

There is going to be a slight change this year. Instead of holding Sports Day and Running Races on separate days, we are combining them. We will be doing activities for Sports Day as usual in groups. I will be posting the plan, the rules, about on how to sign up and their fee change.

What your International School can achieve with **Frog**

- ✓ **Support teachers, pupils, and parents** in all aspects of teaching, learning & administration

- ✓ **Manage and send communications** related to extracurricular activities, clubs, and groups

- ✓ **Bring all school systems together** in one place with a simple secure log-in

- ✓ **Draw upon and share data** insights and reports to key stakeholders

- ✓ **Complete flexibility** to construct, share and assess against your curriculum

- ✓ **Personalise your platform** and embed your brand and ethos in the heart of your school

Why International Schools choose **Frog**

Fully Branded Platform

Frog reflects your brand, demonstrating your commitment to technology, staff, students, parents, and standards.

Supporting Your Staff

Frog is easy and intuitive to use, and new staff will pick it up easily. Everyone can save time while experimenting with innovative teaching methods.

Connect with Parents

Frog gives you meaningful ways to engage with prospective parents and greater control over student retention through better school-home dialogue.

Tailored to You

Frog is flexible, powerful and dynamic. It will support your existing systems, processes and school development plan. We will work with you to tailor Frog to your school's needs.

Personalised Learning

With diverse student needs, and many reasons for student absence, Frog will allow you to personalise learning in the classroom and beyond, to ensure every child reaches their full potential, whatever the circumstances.

Visibility & Leadership

Support decision-making with a central place for key insights. Frog gives you insights into key areas such as homework, subject engagement, gaps in attainment and behaviour patterns for staff, students, parents and visitors.

Standing out from the Competition

The International Schools market is ever more competitive. Frog helps you to stand out, supporting you in raising standards, helping build closer relationships with parents and the community whilst making a bold statement about your commitment to innovative teaching and learning.

Ensuring Business Continuity

Your school needs to plan for business continuity, often in unpredictable circumstances. Severe weather, political uprisings, government restrictions and a global pandemic have all affected the operation of schools in recent times. Frog will allow you to transition seamlessly to online provision not only of teaching and learning, but to a whole virtual school.

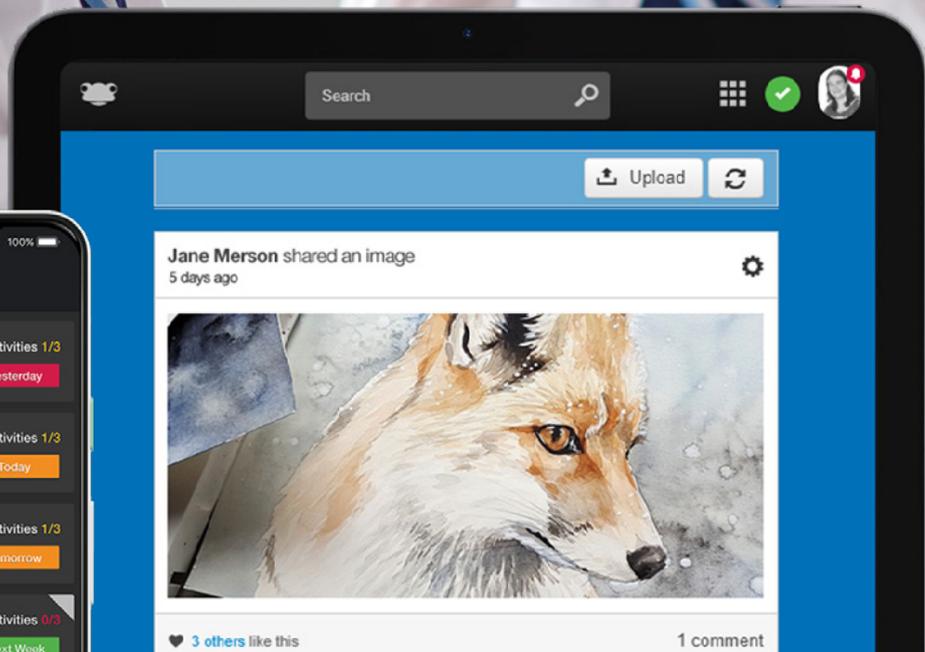

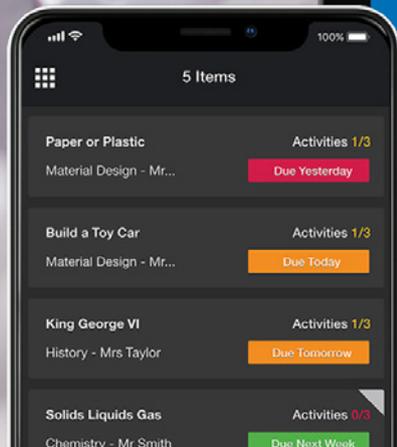

Value for Money

You operate in a competitive marketplace and budgets play a key role. Frog gives you a wide range of teaching and learning tools, a selection of innovative apps and your own web space to create as many online portals as you wish, all under one licence. Your investment will open a world of benefits for your school.

- ✓ Independent Learning
- ✓ Blended & Flipped Learning
- ✓ Extra Curricula
- ✓ Parent Engagement
- ✓ Wellbeing
- ✓ Safeguarding
- ✓ Personal Development
- ✓ Self-Marking Quizzes
- ✓ Sharing Resources
- ✓ Communication
- ✓ Collaboration

Arbor School, Dubai

The School was looking for a tech solution that would help them bring everything together. This included every school, MIS, curriculum, assessments, clubs & trips, home learning and reporting. They chose Frog and have been hugely successful in utilising ePortfolios to create a personalised space for pupils and their parents. The ePortfolios contain daytime school activities, progress reports, clubs and schoolwork, all now available in one place.

British School of Paris, France

BSP is a progressive school that moved fast pre-lockdown to create online lessons in Frog to support the move to remote learning. Everything was curriculum mapped and all content could be accessed from any device, anywhere and around the clock. Using a combination of Frog and O365 they have seen a marked improvement in technical ability and an increase in results at the school.

Brighton College, Singapore

Starting out as a brand-new school in Singapore, Brighton College was looking for a way to showcase children's work and activities with parents. With many of their children unable to attend school through the pandemic, their approach to remote teaching and learning has proved highly successful for them using the Frog platform.

St. Georges, Spain

The school has adopted a fresh, responsive and engaging approach to teaching, learning, and assessment. They have evidenced great success through this work and use this to identify and close the gaps between where a child is and their potential whilst engaging the children and teachers to achieve fantastic results. They have found Frog to be an invaluable solution for tracking pupil progress.

Prasarnmit Demonstration School, Thailand

Prasarnmit Primary International Programme (PPiP) is a nurturing, inclusive school that provides children with the knowledge and skills to prepare them for their future in an ever changing world. PPiP turned to Frog for support with bridging the gap between school and home. They wanted to better engage parents in day-to-day school life, through greater visibility and strong communication channels.

Ellesmere College, UK

Ellesmere College is based in the UK but with international students located in China they needed a round-the-clock way to provide a consistent teaching and learning experience. Frog has helped them to achieve this with a central platform where students can access everything they need, regardless of time or location.

Edron School, Mexico

Located in a remote area of Mexico City and with many disparate systems in use across the school. The Edron Academy needed something to bring everything and everyone together. They sought a solution to combine their curriculum and learning materials with a way to communicate pupil activity with parents. They chose Frog and put the Google integration to beneficial use to combine activities.

Canterbury School, Gran Canaria

Working across four separate campuses, Canterbury School was looking to implement a whole-group approach for teaching, learning, assessment, and communication activities. It was important to maintain an individual look and feel at each school whilst following a unified vision and ethos. Frog enabled them to create cohesive yet personalised spaces throughout so that pupils and parents can experience the school's culture through every touch point.

Frog Professional Development for Schools

The modern solution for staff CPD and Compliance Training

Staff training and development is important in any organisation. For International Schools, it has profound significance. From attracting the right staff and dealing with a high staff turnover, through to managing regional compliance and keeping staff up-to-date and refreshed on school policies and procedures, your school's investment in staff training is vital.
